Education

Pune Institute of Computer Technology (PICT), Pune — **CGPA: 9.795**
Bachelor of Engineering – Computer Engineering — *Sept 2023 – May 2027 (Expected)*

J.E.S. College, Jalna — **MHT-CET: 99.40 percentile, HSC: 90.50%**
Higher Secondary Certificate (HSC) — *Feb 2023*

S.M.S. Jain Vidyalaya, Jalna — **Score: 91.20%**
Secondary School Certificate (SSC) — *2021*

Experience

Barclays — **June 2026 – Aug 2026**
Software Engineering Intern – GTIS (Network Automation) — *Pune, India*

– **GTM Automation Enhancements**
  * Worked on a production-grade GTM Automation platform built using FastAPI for automated provisioning and management of F5 GTM resources (WideIPs, Pools and Pool Members).
  * Identified **15+ workflow and reliability issues** and contributed to architectural improvements including event-driven processing, async database sessions , Celery optimization, caching and OpenTelemetry tracing, improving average request completion time from **12–15 min to 4–5 min**.

– **GTM Observability Dashboard**
  * Designed and developed a production dashboard using **Django** with backend APIs implemented in the existing FastAPI service.
  * Implemented request lifecycle tracking, advanced filtering, pagination, failure analytics and performance dashboards, integrating with Barclays' **Network Requests (NR)** portal for end-to-end tracing using ServiceNow and Ansible metadata.

Projects

TraceHost: Suspicious Website Hosting Detection System | Network Security

– Developed a solution for **Madhya Pradesh Police** to detect hosting providers masked by Cloudflare.
– Implemented mechanisms to analyze **SSL certificates** and retrieve hosting details (**DNS Lookups , WHOIS analysis**).
– Enabled accurate threat intelligence through real-time data analysis and network probing.

RentEasy: Rental Marketplace Platform | MERN Stack

– Developed a **rental marketplace** for listing and renting tools, gadgets, and furniture with complete rental workflows.
– Implemented **JWT and Google OAuth** authentication, product reviews, notifications, cart management, and availability tracking.
– Built a **product recommendation system** using Content-Based Filtering and Popularity-Based algorithms.
– Integrated **Cloudinary** for image storage and developed REST APIs for product, user, and rental management.
– Developing real-time renter–owner chat using **Socket.IO** and secure payment gateway integration.

Honors & Awards

* **ICPC** (International Collegiate Programming Contest) Amritapuri Regionalist 2026 – **AIR 99**.
* Codeforces **Specialist** (Max rating 1527) | Leetcode **Guardian** (Max rating 2148) | Codechef **4-star** (Max rating 1804)
* Runner-up, NCC 2024 | Runner-up, Reverse Coding (Credenz 2025) | 5th Place, Reverse Coding (PICT IEEE 2024).

Technical Skills

Languages: C++ , Python
Backend: FastAPI, Django, Node.js, REST APIs, Celery
Frontend: React.js, HTML, CSS
Databases: MySQL, MongoDB , MSSQL , PostgreSQL
Tools & Platforms: Git, Github , Visual Studio Code
Coursework: Data Structures and Algorithms, Object Oriented Programming

Extracurricular Activities

* Core Member – **ACM PICT Student Chapter.**
* Organized **PASC CIPHER Contest** for introducing importance of DSA to Juniors.
* Active Participant – Intra-college Coding Competitions.
